

Richmond Hill Order Picker License

Richmond Hill Order Picker License - Order preparation operation or also called order picking as it is more commonly known is a process used in warehouse operations and consists of personnel called order pickers. The order picker's job is to take and collect articles in certain quantities to complete the client's orders before shipment. Order picking is an easy warehousing method. The efficiency in which this job is accomplished could be directly connected to the productivity of a supply chain. Therefore, order picking is among the most controlled logistic methods. Order picking falls in the category of the warehouse management system.

There are several specific kinds of order picking. The main kinds comprise: pick to box method, wave picking method, piece picking or picker to part method, sorting systems method and zone picking method.

The pick to box method consists of the order picker filling the box with the things from his or her station. The box then moves to the other picking stations until the customer order is finish. In this technique, there is no movement of the order picker workers. In the wave picking method, the order pickers move round to be able to collect the required items for several orders. The piece picking or picker to part method is similar where the order pickers or picker move to collect the stuff needed but for one order only.

In the sorting systems method, there is no movement of the order picking staff. Instead, the products are brought to her or him through an automated system like automatic storage or a conveyor system. In the zone picking method, every order picker is assigned to one particular zone. They are responsible for only realizing order picking within this particular zone.
